For the "CLOSED" license, please see the license agreement.

This software includes both proprietary and open source components. The proprietary components may only be used after execution of the relevant Renesas Licensing Agreement. If you have not executed such an agreement you are not authorised to use this software. All open source components constitute a separate delivery and are licensed according to the applicable terms of their respective open source licenses. All open source software is delivered "AS IS" with no warranties. While Renesas seeks to provide complete and accurate licensing information with regard to each open source package, Renesas does not warrant or represent that the licensing information is complete or error-free.

Please refer to the source code itself and documentation texts included in the source code archive for details about the license or copyright information.

All the source code can be downloaded from "RZ/V2H AI SDK v5.00 Source Code (ZIP)" in this link:
